Foreword

Preface

Acknowledgment

Preamble

Efficient and Interoperable E-Business –based on Frameworks, Standards and Protocols:
by
Frank-Dieter Dorloff, University of Duisburg-Essen, Germany
Ejub Kajan, State University of Novi Pazar, Serbia

Section I
General Approaches to E-Business Interoperability –
Standards, Data exchange, Semantics

Chapter 1
The reality of using standards for electronic business document formats
Tim McGrath, Document Engineering Services, Australia

Chapter 2
Analysis of Interoperability of e-Business documents
Ivan Magdalenić, University of Zagreb, Croatia

Chapter 3
Harmonized and Reversible development framework for HLA based interoperable application
Zhiying Tu, University of Bordeaux, France
Chapter 4
Concepts for Enhancing Content Quality and eAccessibility – In General and in the Field of eProcurement

Christian Galinski, Infoterm, Vienna, Austria
Helmut Beckmann, Heilbronn University, Germany

Chapter 5
BOMOS – Management and Development Model for Open Standards

Erwin Folmer, Netherlands Open in Connection, TNO, Netherlands

Section II
General Approaches to E-Business Interoperability – Interdisciplinary and Applications-oriented concepts

Chapter 6
Interoperability Support for E-Business Applications through Standards, Services and Multi-agent Systems

Rainer Unland, University of Duisburg-Essen, Germany

Chapter 7
Ontologies for Guaranteeing the Interoperability in e-Business – a business economics point of view –

Stephan Zelewski, University of Duisburg-Essen, Germany
Adina Silvia Bruns, University of Duisburg-Essen, Germany
Martin Kowalski, University of Duisburg-Essen, Germany

Chapter 8
How Semantic Web technologies can support the mediation between supply and demand in the ICT market: the case of Customer Relationships Management

Anna Maria Goy, University of Torino, Italy
Diego Margo, University of Torino, Italy

Chapter 9
Customer Decision Making in Web Services

Zhaoxiao Sun, University of Ballarat, Australia
Ping Zhang, CSIRO, Melbourne Australia
Dong Dong, Hebei Normal University, China

Chapter 10
The Metaphorical Foundation of Interoperability Artifacts: The Case of Public Services

Veit Jahns, University of Duisburg-Essen, Germany
Chapter 11
Standards for Achieving Interoperability of eGovernment in Europe
Marc Wilhelm Küster, University of Applied Sciences Worms, Germany

Section III
Standards for Security and Trust in E-Business

Chapter 12
Fundamental Building Blocks for Security Interoperability in e-Business
Muhammad Asim, Philips Electronics, Netherlands
Milan Petković, Philips Electronics, Eindhoven University of Technology, Netherlands

Chapter 13
Sven Feja, Christian-Albrechts-University of Kiel, Germany
Sven August, Christian-Albrechts-University of Kiel, Germany
Andreas Speck, Christian-Albrechts-University of Kiel, Germany
Meiko Jensen, Ruhr-University Bochum, Germany
Jörg Schwenk, Ruhr-University Bochum, Germany

Chapter 14
Trust Management and User’s Trust Perception in e-Business
Elisa Costante, Eindhoven University of Technology, Netherlands
Milan Petković, Philips Electronics, Eindhoven University of Technology, Netherlands
Jerry den Hartog, TU/e Eindhoven University of Technology, Netherlands

Section IV
Dealing with E-Business Data – Classification, Exchange, Harmonization

Chapter 15
Privacy-Conscious Data Mashup: Concepts, Challenges and Directions
Mahmoud Barhamgi, Claude Bernard Lyon1 University Villeurbanne, France
Chirine Ghedira, Claude Bernard Lyon1 University Villeurbanne, France
Salah-Eddine Tbahriti, Claude Bernard Lyon1 University Villeurbanne, France
Michael Mrissa, Claude Bernard Lyon1 University Villeurbanne, France
Djamal Benslimane, Claude Bernard Lyon1 University Villeurbanne, France
Brahim Medjahed, University of Michigan-Dearborn, USA

Chapter 16
Co-ordination and specialisation of semantics in a B2B relation
Fred van Blommenstein, University of Groningen, Netherlands

Chapter 17
An examination of standardised product identification and business benefit
Douglas. S. Hill, University of Southampton, UK
Chapter 18
Towards Crowd-Driven Business Processes
*Maja Vuković, IBM T.J. Watson Research, U.S.A*
*Claudio Bartolini, HP Labs, U.S.A*

Chapter 19
Unified Data Model for Large-Scale Multi-Schema Integration (ULMI)
*Michael Dietrich, SAP, Germany*
*Jens Lemcke, SAP, Germany*

Chapter 20
Flexible classification standards for product data exchange
*Wolfgang Wilkes, Fernuniversität Hagen, Germany*
*Peter J. A. Reusch, Fachhochschule Dortmund, Germany*
*Laura Esmeralda Garcia Moreno, Fachhochschule Dortmund, Germany*

Section V
Business Process Modeling, Validation and Monitoring

Chapter 21
Semantic Monitoring of Service-Oriented Business Processes
*Roman Vaculin, IBM T.J. Watson Research, U.S.A*

Chapter 22
Supporting Semantic Verification of Process Models
*Michael Fellmann, University of Osnabruück, Germany*
*Oliver Thomas, University of Osnabruück, Germany*
*Frank Hogrebe, University of Hamburg, Germany*

Chapter 23
Tool based Integration of Requirements Modeling and Validation into Business Process Modeling
*Sven Feja, Christian Albrechts University of Kiel, Germany*
*Sören Witt, Christian Albrechts University of Kiel, Germany*
*Andreas Speck, Christian Albrechts University of Kiel, Germany*

Section VI
Research on Service Quality and Service-Oriented E-Business Architectures

Chapter 24
Service Quality: Status and Research Directions
*Sue Conger, University of Dallas, USA, Rhodes University, South Africa*

Chapter 25
An event-based middleware for the management of choreographed services
Chapter 26
Collaboration-based Model-Driven Approach for Business Service Composition
Surya Bahadur Kathayat, Norwegian University of Science and Technology, Norway
Hien Le, Norwegian University of Science and Technology, Norway
Rolv Bræk, Norwegian University of Science and Technology, Norway

Chapter 27
Enterprise Service Bus for Building Integrated Enterprises
M. Antonia Martínez-Carreras, University of Murcia, Spain
Francisco J. García-Jiménez, University of Murcia, Spain
Antonio F. Gómez-Skarmeta, University of Murcia, Spain

Chapter 28
Measuring Quality of Electronic Services: Moving from Business-to-Consumer into Business-to-Business marketplace
Mahmoud Amer, Carl von Ossietzky University of Oldenburg, Germany
Jorge Marx Gómez, Carl von Ossietzky University of Oldenburg, Germany

Section VII
Semantically-enabled E-Business Architectures

Chapter 29
Bahareh Rahmanzadeh Heravi, Brunel University, UK
Mark Lycett, Brunel University, UK

Chapter 30
Semantic Alignment of E-Business Standards and Legacy Models
Janina Fengel, University of Applied Sciences, Darmstadt, Germany

Chapter 31
Towards Supporting Interoperability in e-Invoicing based on Semantic Web Technologies
José Manuel Gómez-Pérez, Intelligent Software Components (iSOCO) S.A., Spain
Víctor Méndez, Intelligent Software Components (iSOCO) S.A., Spain

Section VIII
Applications fields and experiences

Chapter 32

Ioannis Savvas, Agricultural University of Athens, Greece
Nick Bassiliades, Aristotle University of Thessaloniki, Greece
Kalliopi Kravari, Aristotle University of Thessaloniki, Greece
Georgios Meditskos, Aristotle University of Thessaloniki, Greece

Chapter 33
Towards a Healthcare Interoperability Framework based on Medical Business Artifacts, Social Networks, and Communities of Healthcare Professionals

Zakaria Maamar, Zayed University, Dubai, UAE
Yousef Baghdadi, Sultan Qaboos University, Oman

Chapter 34
Emerging Standards and Protocols for Governance, Risk and Compliance Management

Marcus Spies, LMU University of Munich, Germany
Said Tabet, EMC, U.S.A

Chapter 35
Governmental Service Transformation through Cost Scenarios Simulation: The eGOVSIM Model

Yannis Charalabidis, University of the Aegean, Greece

Chapter 36
SIGA3D: Semantic Combination of IFC and GIS to support Urban Facilities Management

Clément Mignard, Active3D, Dijon, France
Christophe Nicolle, University of Bourgogne, France

Chapter 37
Challenges for adoption of e-Procurement: An SME perspective

Kelly Liljemo, University of Agder, Norway
Andreas Prinz, University of Agder, Norway
